PROJECT

Quiz Application

Java, Spring-MVC, Spring-Boot, Spring-DAO

In this project collection of different types of quizzes are there like Technical, games, sports, etc. those are different levels. A user can play all quiz and attempt any one of them at a time. There will be the limited no of question and for each correct answer user will get a credit score.

Customer Relationship Management System

Java, JSP/Servlet, JDBC, MySQL

We have design a CMR Project in java,which has three main roles i.e., Admin,Employee and Users. Admin bring the primary user. Which Admin can Add/Remove/Update any details related to the product or Employee Or Customer like product categories and details about product will be update or delete, perform CRUD operation on Employee details FAQ. Employee will be handle Customer Details, Complaints and inquiry about product.

Camping Tools And Equipment

Android, FireBase

An application-based shopping system is being developed as part of this project. With this, clients are supposed to receive high-quality products and have better camping experiences. It allows you to buy things in the store from anywhere on the internet using an Android device.

Jarvis AI Desktop Voice Assistant

Python,AI

In this project we can works on voice input and give output through voice and displays the text on the screen. Virtual assistants are software programs that help you ease your day-to-day tasks, such as showing Timing, whether report, tell us anything you want from google.
